

**Dan:** Hi, buddy! Great to see you again :).

**ET:** Hello, Dan! How are you?

**Dan:** I'm excited to see you again! The first time we met outside my window at 3 am. you scared the sh\*t out of me! I'm used to you now that you speak English as I do. You succeeded in making me feel safe and comfortable through your telepathic messages.

**ET:** I don't speak using languages. But it can be fun when I speak with a Cockney accent.

**Dan:** So, what have you been up to in the Cosmos? Do you think I'll get a chance to ride on one of your spacecraft?

**ET:** You will even get to be in the driver's seat!

**Dan:** OK, awesome! What news do you have for me?

**ET:** I've got some bad news to tell you, but you're already aware of them.

**Dan:** Aware of what?

**ET:** You have the dumbest 4-star generals on Earth! And the stupidest Commanders-in-Chief on planet Earth!!! And some them are your presidents and heads of governments.

**Dan:** Can you explain?

**ET:** Look at what those generals are doing! They destroy the trees in the forests with their tanks and soldiers and shoot them down. Not only are they massacring nature but bombing buildings in cities with children in them.

**Dan:** Why are they so dumb doing that?

**ET:** They are dumb because their Commanders-in-Chief are also dumb and stupid. So they follow orders. They think other people who are different from them are their enemies. It's just like thinking trees in the forests or buildings are their enemies. Hence they try to destroy them. Trillions of dollars are allowed each year to stockpile nuclear weapons. There are now over 12,000 nuclear warheads on Earth.

**Dan:** I see these generals do not know who their enemies are and using our tax dollars to fight the wrong enemy.

**ET:** The true enemies are entrenched inside their heads. And most of them are not even aware of being whacked by their subconscious negative thoughts!

**Dan:** That's why you're worried. And why you broke into our TV system in 1977 during a live news broadcast on British Television to warn us? Correct? You know we have a recording of your voice, Vrillon!!

**ET:** Oh, so you know my name!!

**Dan:** Yes, we live in a small world, er, galaxy. You can listen to your own voice here at [myfeelgoodnow.com](http://myfeelgoodnow.com) (scroll down the list of videos).

**ET:** Yes, we are worried. That's why we shut down some of your nuclear missile systems. Ask Captain Robert Salas of the US Air Force and Director of National Intelligence. He testified before the press.

**Dan:** OK, I got you! You're asking us, dumb kids, not to play with fire or risk getting burned or wiped out from this beautiful planet.

**ET:** You got it, Dan!

**Dan:** Hey, when can we have another chat? Are you on Zoom? I'd like to get your feedback on ChatGPT.

**ET:** I'll be back. Take care. Share this interview if you're concerned about the insanity inflicted on the men, women, and children of Earth by dummies.
